August 31, 2020

1 LIMERICKS

Today I yearn for energy
Yesterday lessons now a memory
I pray for a sip
O Java, come to my lip
For this code is only elementary

2

Stuck in my room to my dismay
I can feel my fingers slowly decay
But the code finally works
My back still hurts
And the due date was yesterday

3

Though my favorite language is Java
It does come with a bit of drama
I type and I delete
To make my assignment complete
Now my blood boils like lava
